

Keeping the World Flowing for Future Generations

Rotork Fairchild's High Pressure - Pressure Reducing Regulator is suitable for 690 bar (10000 psig) inlet and outlet hydraulic and pneumatic applications.

Tapped exhaust port allows for convenient capture of vented media. Age hardened stainless alloy seat provides a unique combination of ultra high strength, toughness, and outstanding corrosion resistance. Zirconia oxide ceramic ball provides high strength and excellent wear resistance to provide a reliable, long-lasting unit in harsh applications.

Applications

- Wellhead Control Panels (WHCP)
- Topside and Subsea valve actuation
- Component testing
- Hydraulic Power Units (HPU's)

Features and Benefits

- Cartridge-style service insert allows quick change of the main valve and filter without removal from control panel or process lines thus preventing damage to fittings or regulator port threads
- Internal 40µ supply filter protects equipment from contamination at high differential pressures
- Ceramic main valve for severe service application, superior performance and enhanced product durability
- NACE compatible design
- High impact knob
- Piston-sensed design ensures safety and reliability
- Segregated captured vent for control of relief media

Specifications

Maximum Inlet Pressure

- 690 bar (10000 psig)
- **Ambient Operating Temperature**
- -40 to +80 °C (-40 to +176 °F)

Flow Capacity

Main valve: Cv = 0.09, Vent valve: Cv = 0.11

Leakage

Main Valve: 0.05 drop/min

Weight

2.95 kg (6.5 lbs)

Design Proof Pressure

1.5 times maximum working pressure

High Pressure Regulator

Outlet Pressure Ranges

psig	bar
0-500	0-34.5
0-1000	0-69
0-1500	0-103
0-3000	0-207
0-5000	0-345
0-10000	0-690

Process Media Contact Materials

Body Supply and Vent Seats Supply Valve Internal Components Back-up Ring O-Rings

316 Stainless Steel	
MP35N	
Zirconia Oxide Ceramic Ball	
316 and 17-4 PH	
PTFE	
Nitrile or Fluorocarbon
